DETAILED ACTION

The amendment filed November 3, 2005 has been entered.

Claims 1-5, 8-14, 16-20 and 22-29 are pending.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

This application contains claims 2, 3, 13, 14, 16-20, 22 and 23 drawn to an invention nonelected with traverse. In addition, claim 1 recites non-elected SEQ ID numbers. A complete reply to the final rejection must include cancellation of nonelected claims and non-elected SEQ ID numbers or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claims 2, 3, 13, 14, 16-20, 22 and 23 are withdrawn as drawn to non-elected inventions.

Claims 1, 4, 5, 8-12 and 24-29 are elected, to the extent they are drawn to SEQ ID NO: 1. Applicant is reminded of the requirement to cancel non-elected material and non-elected claims.

Claim Rejections - 35 USC § 112

1. The rejection of claim 1 and claims 4-12 and 24-29 in the recitation of “negligible reduction in the enzymatic action” is withdrawn in view of the deletion of this phrase.
2. The rejection of claim 8 as indefinite in that it is unclear what is intended by “functional” is withdrawn in view of the amendment of the claim.
3. The rejection of claims 9 and 10, and claims 11 and 12 as indefinite in the recitation of “oil-producing organism” is withdrawn in view of applicants arguments. However, it is noted

Art Unit: 1638

that as written the claim can be interpreted to read on the claimed process using any organism, given that all known organisms produce oil in some form.

The rejection of claim 26 as indefinite in that it seems to be missing words and does not make sense, is withdrawn in view of the amendment of the claims.

Claims 1, 4, 5, 8-12 and 24-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, as stated in the previous office action.

Applicants' arguments filed November 3, 2005 have been fully considered but they are not persuasive. Applicants assert that with the cloning of cer-1 and cer-3, a representative number of compounds have been disclosed that meet the written description requirement. Applicants argue that the Examiner has not rebutted the presumption of an adequate written description. The Examiner maintains that applicants have not described the specific structural features that are required in a DNA sequence that encodes a polypeptide having delta-6 acetylenase and/or delta-6 desaturase including any sequences encoding a polypeptide having at least 75% homology and having at least 10% of the enzymatic activity of the polypeptide of SEQ ID NO: 2. Therefore, the claimed genus is not described.

4. Claims 1, 4, 5, 8-12 and 24-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which

Art Unit: 1638

was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention, as set forth in the previous office action.

Applicants' arguments filed November 3, 2005 have been fully considered but they are not persuasive. Applicants assert that the specification provides enough guidance to practice the claimed invention, stating that methods for transforming organisms are provided and vectors are disclosed, and transformed plants are created in the examples, and oil is extracted. The Examiner maintains that the specification does not make clear what sequences are used in the examples. The Examiner maintains that the specification does not enable one skilled in the art to make and/or use the claimed invention for the reasons set forth in the last office action.

Conclusion

5. This is a RCE of applicant's earlier Application No. 09/980,468. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1638

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
